

**METHOD AND SYSTEM FOR HANDLING RESOURCE REQUESTS
ON A MONETARY PRIORITY BASIS**

5

Abstract of the Disclosure

A method of handling resource requests on priority basis. The method comprising receiving a resource request from a preferred subscriber having a monetary priority designation and processing the job request from the preferred subscriber prior to processing other job requests from non-preferred subscribers having a non-priority designation.

10

A resource request handling system comprising at least one preferred subscriber, at least one non-preferred subscriber, and a throughput resource. The preferred subscriber has a monetary priority designation and the non-preferred subscriber has a non-monetary priority designation. The throughput resource has a priority scheduling queue configured for handling resource requests of the preferred subscriber prior to handling resource requests of the non-preferred subscribers.
